**Cerakote® C-Series Ambient Cure Ceramic Coating** has been designed to protect both metal and non-metal substrates. Additionally, C-Series Ambient Cure Ceramic Coatings have been designed to withstand extreme use temperatures. This makes the coating ideal for mid-temperature system and firearm applications. Cerakote C-Series Ambient Cure Ceramic Coatings maintain excellent adhesion even after repeated thermal cycling. These coatings provide superior protection against corrosive environments and thermal shock. In addition, the C-Series Ambient Cure Ceramic products are designed for ease of application. The pencil hardness and scratch hardness is between 4H and 9H depending on the color.

***Full Cerakote (HEAT CURED) Service available offsite. Prices will vary based off of number/size of pieces and colors.***
